TRS 2-ROW H-SERIES SPRAYER

TRS H-SERIES 2-ROW HERBICIDE SPRAYER

MODEL NAME: H2-1500

Our TRS Sprayers & Equipment trailed Herbicide Sprayer is designed to offer an effective weed solution for vineyards of all sizes and conditions.

Our Herbicide Sprayers are available in both non-shrouded and shrouded boom options to suit your specific requirements and achieve excellent weed control even in windy conditions.

The TRS Herbicide sprayer is easy to setup, operate and maintain with double breakaway on the droppers and individual motor valves for reliability, controlling each section independently, and numerous hydraulic options to make operation even easier.

FEATURES & BENEFITS:

- 1500L Polyethylene tank
- 120L Freshwater tank
- 17L Hand wash tank
- Bertolini poly 2073 pump with maximum flow of 75L at 10 bar pressure, with hydraulic drive it - requires 21L/min oil flow
- Simple electric on / off valve in cab electric pressure control, or optional upgrade to BRAVO 180S auto rate controller
- Standard heavy duty over-row boom
- Hydraulic boom arm fold
- Droppers are each mounted on independent breakaways
- Centre spray out for total coverage of row area
- Pivoting tow hitch

SHROUDED SPRAYER OPTION:

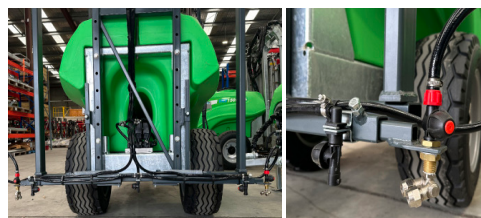

The shrouded spray kit provides a covered, protected environment to ensure the herbicide spray is unaffected by the wind.

Brushes and canvas covers on the shrouds move around vine trunks and posts, each head is mounted on an individual breakaway system to protect it from impact damage.

Nozzles can be easily adjusted beneath the shrouds for precise spray and can be angled up to apply de-budding sprays if desired.

SHROUDED

NON-SHROUDED
